OBJECTIVE

Third-year Information Technology student at Tangub City Global College with hands-on experience building full-stack and mobile applications using Flutter, SQLite, and modern web technologies. Comfortable owning a project end to end, from planning and interface design through backend logic and deployment, as shown across multiple independently developed applications. Seeking an internship or entry-level development role to apply these skills and continue growing as a software engineer.

EDUCATION

Bachelor of Science in Information Technology

3rd Year, In Progress

Tangub City Global College

Tangub City, Misamis Occidental

TECHNICAL SKILLS

Languages & Frameworks:

Flutter/Dart, JavaScript, TypeScript, Python, PHP, HTML5, CSS3

Databases & Backend:

SQLite, MySQL, Firebase, PostgreSQL

Tools & Practices:

Git, GitHub, REST APIs, Offline-First App Design, UI/UX Prototyping, Figma, Canva

EXPERIENCE

Student Developer Peer Requested Academic Projects

Ongoing

- Independently designed and developed complete mobile and system based applications for classmates whose academic requirements called for software beyond their own technical background.
- Took full ownership of each build including requirements gathering, UI design, backend logic, and testing, delivering functional, presentable systems ahead of academic deadlines.
- Worked across multiple project domains including visitor management systems, productivity tools, and mobile utility apps.

PROJECTS

- Visitor Management System** Flutter based visitor management platform for Tangub City Global College featuring QR check in, role based admin and security access, blacklist control, and auto generated visit certificates.
- Smart Seat Planner** Offline first Flutter app for teachers to manage class rosters, attendance, and automatic at-risk student flagging.
- GoalSave** Personal savings goal tracker with quick save presets, streak tracking, and monthly progress visualization.
- My Health Fitness** Fitness tracking app with activity rings, workout history, and BMI based profile stats.
- OJT Time Tracker** Time logging app for tracking OJT and internship hours against a required quota, with live completion tracking.
- AdShield** System wide Android ad and tracker blocker using a local, on-device VPN.
- AI Writing Assistant** Flutter app integrating the Claude API to rewrite AI sounding text into natural, human-like writing.
- AI Code Assistant** Flutter app powered by the Gemini 2.0 Flash API that debugs, explains, writes, and converts code.
- File Processing API** RESTful API built with Node.js and Express for uploading, converting, and extracting data from files.
- Invoice / Receipt Generator API** Lightweight PHP REST API that generates professional invoices and receipts as PDF from JSON data.
